

Abhilashi University has Solar energy, Sensor based energy conservation & sufficient use of LED bulbs/ power efficient equipment.

1. Solar energy

Being situated in hilly areas, Abhilashi University is naturally gifted with bright sunshine and pollution free environment. University has installed solar panels in the boy's hostel and girl's hostel to harness the solar energy. A seminar was also conducted on solar energy in the year 2017 by Abhilashi University to encourage the people to promote the use of solar energy.

2. Sensor based energy conservation

The University also make use of sensor based lights which detect the motion of individuals. They automatically shut down when persons move out of the room. We also make use of 4 star and 5 star rated appliances.

3. Use of LED bulbs/ power efficient equipment

The campus of Abhilashi University is moving towards 100% LED lights and other power efficient equipment. Our students are instructed to use electricity wisely.
